

Siv Sann

Web Developer

About Me

My name is SANN Siv, and I am a student at Passerelles Numériques Cambodia (PNC). During my studies, I have worked on several projects, including a Virtual Company project focused on developing an E-commerce (Service Selling Unique Ring) website, a Weather APP, an Algorithm Project, software deployment with an emphasis on hosting on AWS, and web design project.

Hard Skills

- HTML/CSS
- Bootstrap 5
- Tailwind CSS
- JavaScript
- PHP
- MySQL
- Node.js (Basic REST API)
- OOP with TypeScript
- Laravel
- Algorithm using Python
- Data Analytics with power BI

Soft Skills

- Teamwork
- Communication
- Task management
- Time management

Education

(2025–2026)

Passerelles Numériques Cambodia

Associate Degree in Web Development

(2021–2024)

KlaKun High School

Upper Secondary Baccalaureate Examination (Bac II)

Project Experiences

(15 Feb – 16 Apr 2026)

Service Selling Unique Ring

- **Role:** Scrum Master
- **Technical:** React JS, Node JS, Express JS, Redis, MySQL
- Facilitated Agile ceremonies to ensure streamlined delivery of the web platform.
- Oversaw QA and Dev syncs to ensure high-quality API integration and reliability
- Optimized performance by managing the backlog and team communication

(22 Dec, 2025 – 4 Jan, 2026)

Weather APP

- **Role:** Developer
- **Technical:** HTML, CSS, JS

- Problem solving
- Researching
- Project management

Development Tools

- Git
- GitHub
- Jira
- Figma (Design)
- Netify/Vercel
- AWS
- Linux (Ubuntu)
- Postman
- MS Office (Word, Excel, PowerPoint)
- AI Tools

Language

- Khmer (Mother Tongue)
- English (Intermediate)

AI Tools

- ChatGPT
- Google Gemini
- Cloud code
- DeepSeek
- Cursor
- Antigravity
- Copilot
- Codex

Interest

- Volunteering
- Researching
- Continue learning

- Developed front-end features using HTML, CSS, and JavaScript, ensuring a responsive and user-friendly interface.
- Integrated weather data to provide real-time updates and ensure the system met functional requirements
- Tested system functionality to verify that weather tracking and location features worked as intended.
- Coordinated project progress to ensure all deadlines were met and application remained efficient

(24 Oct – 11 Nov 2025)

Inventory Management System

- **Role:** Developer (Individual project)
- **Technical:** Python, HTML, CSS, MySQL
- Developed a custom inventory system using Python and MySQL to efficiently track stock levels and product data.
- Designed a responsive user interface with HTML and CSS to ensure easy navigation and management of inventory records
- Implemented core database login to handle real-time updates, ensuring data integrity and system reliability.
- Validated system performance through individual testing to ensure all functional requirements for stock management were met

(07 Feb – 26 Feb 2025)

E-commerce website (English for IT)

- **Role:** Full-stack Developer
- **Technical:** PHP, CSS, JavaScript
- Implemented user authentication and form validation to ensure secure data handling
- Built backend login in PHP for users, products, and orders.
- Design responsive UI with CSS and JavaScript
- Integrated fronted and backend for dynamic data handling
